

Rino Pinsetta

 Der "Rino Pisetta" ist der schwierigste und anstrengste Klettersteig am Gardasee, sogar einer der schwierigsten Klettersteige der Südalpen - alleine mit dem Seil, quer durch die Wand, im 5ten Schwierigkeitsgrad. Da ist nicht nur Kraft und Ausdauer sondern auch Klettertechnik gefragt. Allerdings belohnt der „Rino Pisetta“ mit wunderbaren Aussichten und einer unvergesslichen Wegführung. Wenngleich auch anstrengend, so ist dieser Steig doch ein aussichts-reicher Weg, der nicht mit seinen Reizen geizt.

 The "Rino Pisetta" is definitely the most difficult and powerful Iron Path at Lake Garda, and probably one of the most difficult Iron Paths in the south alps. Only with the cable, through the wall, in the 5th difficulty. Here is not only Power necessary, moreover the technique is much more important. But the Rino Pisetta thanks with a great and outstanding view and an unforgettable path. At the one hand, the path needs a lot of power - at the other hand the path shows you new dimensions in doing Vie Ferrate.

 La via ferrata "Rino Pisetta" è la più difficile e faticosa del territorio del Lago di Garda e anche una delle più impegnative ferrate del versante Sud delle Alpi, essendo una parete col 5° grado di difficoltà, praticabile soltanto con le corde. Essa richiede non soltanto forza e resistenza, ma anche una buona tecnica di arrampicata. La via ferrata „Rino Pisetta“ ripaga comunque chi l'affronta con stupendi panorami, grazie al suo particolare sviluppo. Anche se impegnativa, essa offre numerosi e impagabili scorci panoramici.
